

HEALTH, SAFETY & ENVIRONMENT POLICY

As a specialist consultancy in the Health, Safety and Environment (HSE) engineering field, Sherpa Consulting is committed to ensuring that its own operations meet best practices. Our HSE policy is to continually improve and innovate, to ensure that our staff, our Clients and our colleagues can achieve their goals in the safest environment that we can provide, whether in our own offices, our Clients' offices or in the field.

Our goal is to have *no incidents*, and to *minimise damage to the environment*, through sustainable practices.

We will abide by the requirements of the relevant statutory regulations for health, safety and environment. We will also comply with our Clients' HSE and OHS management system requirements when visiting their sites.

Our commitment to the health and safety of our staff is demonstrated by our Business Management System, continual training and incident reporting, and our use of risk identification and management practices.
